

BRIGHT COFFEE SALES ANALYSIS

Presented By: **Nthabiseng Rakuoane**

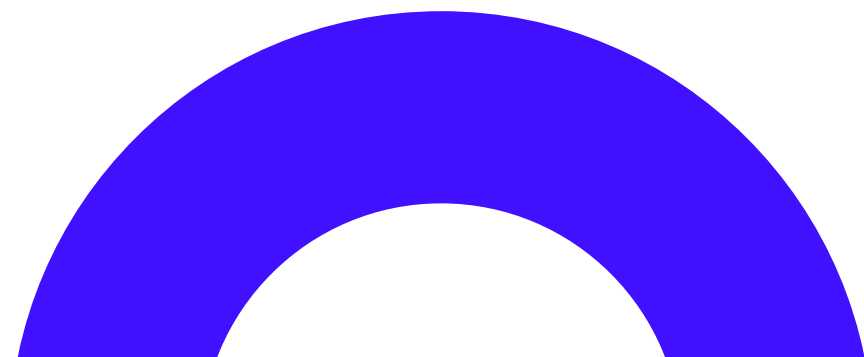

Data-Driven Overview

Total Revenue Across 3 Stores	698812.33
Units Sold	214470
Total Transactions	149116
Number of Unique Products	29

Data Processing

- Load the coffee shop CSV into Databricks.
- Standardise transaction date/time and unit_price.
- Created 3-hour time buckets.
- Calculate $\text{total_amount} = \text{unit_price} \times \text{transaction_qty}$.
- Store the cleaned dataset as a Delta table.
- Use SQL GROUP BY queries for category, product and time analysis.

Revenue By Category

Coffee: R269,952
38.6% of revenue

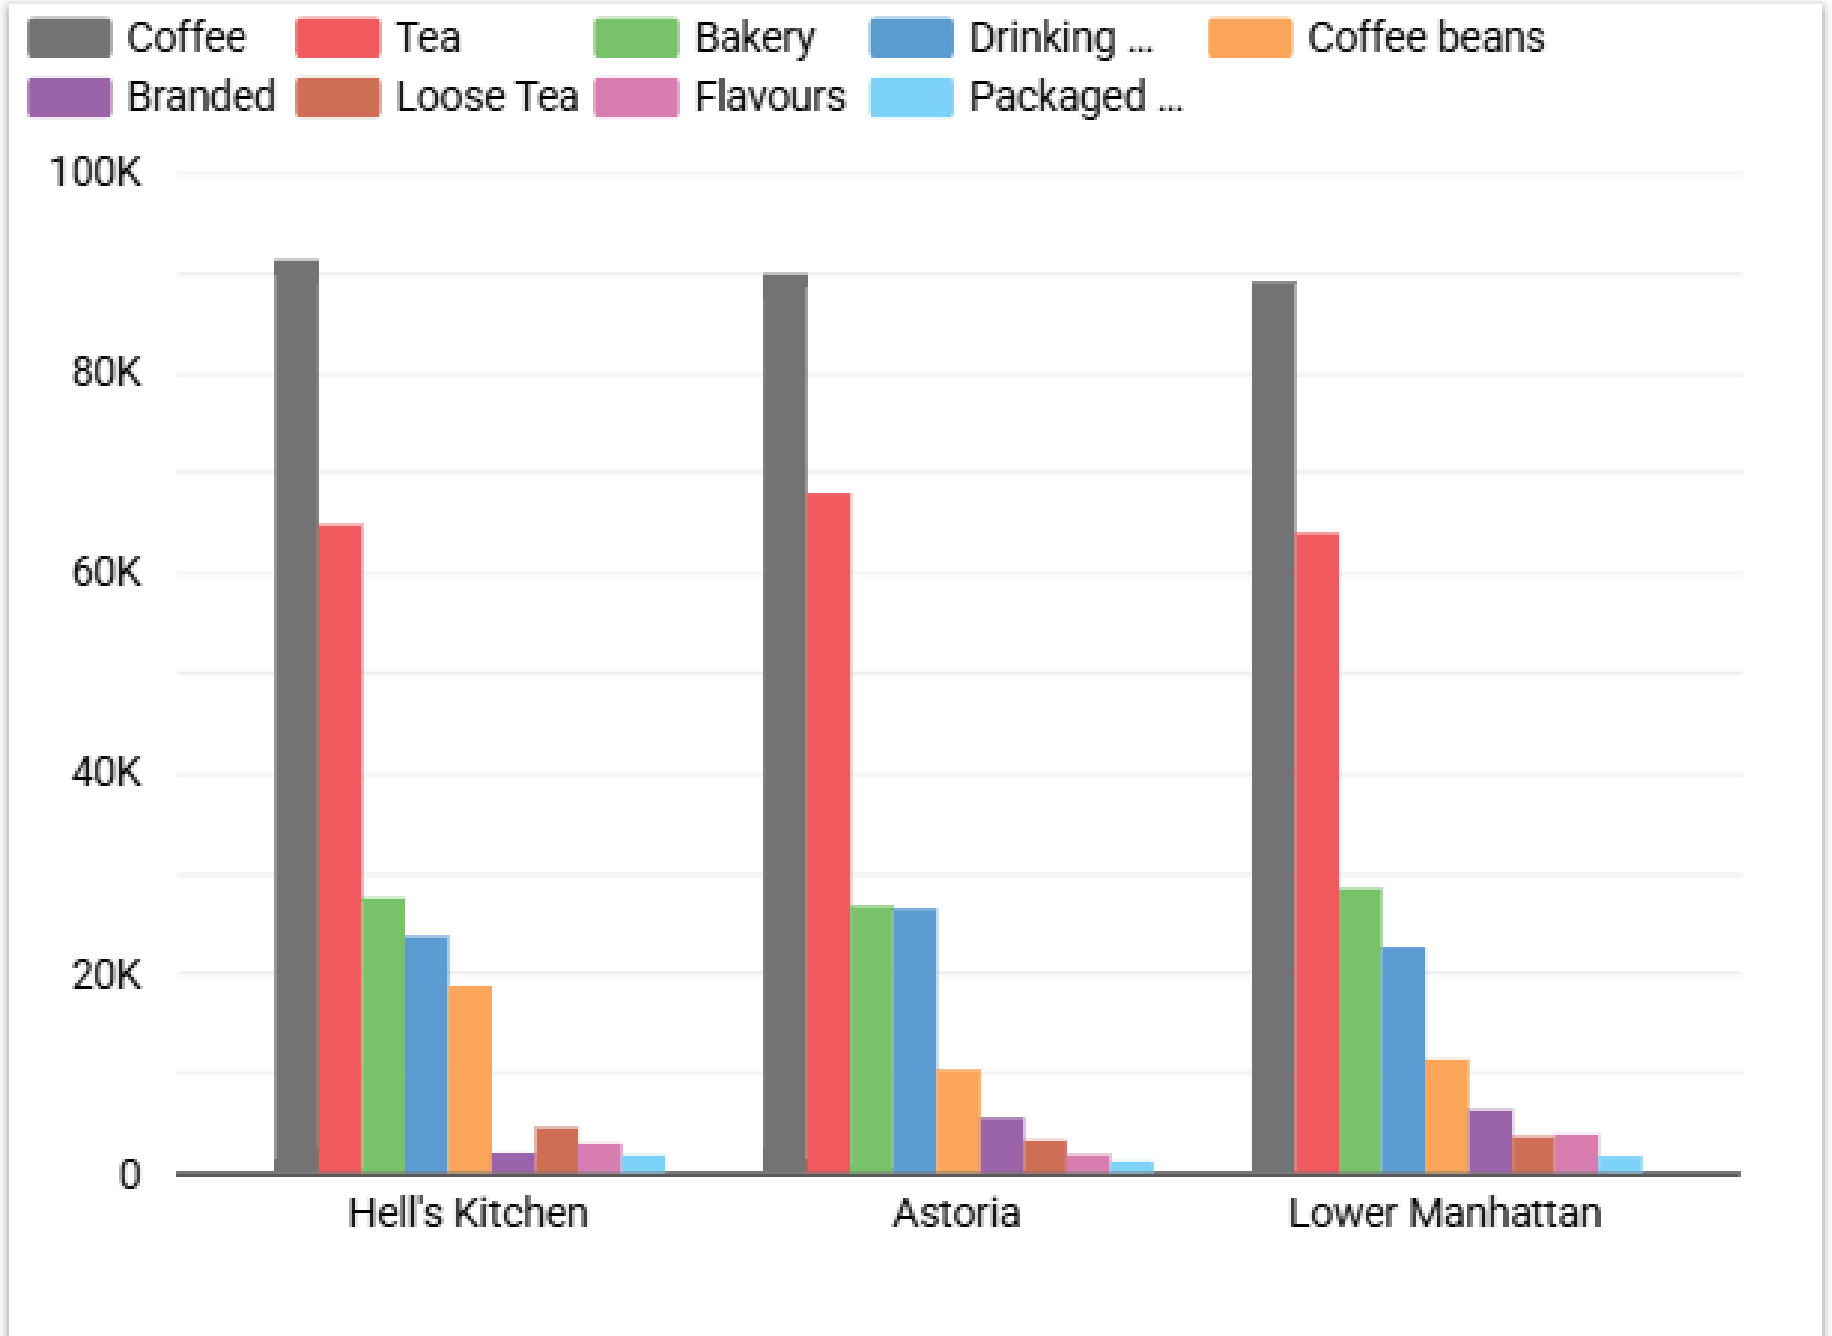

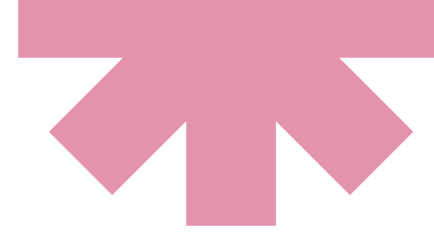

Tea: R196,406
28.1% of revenue

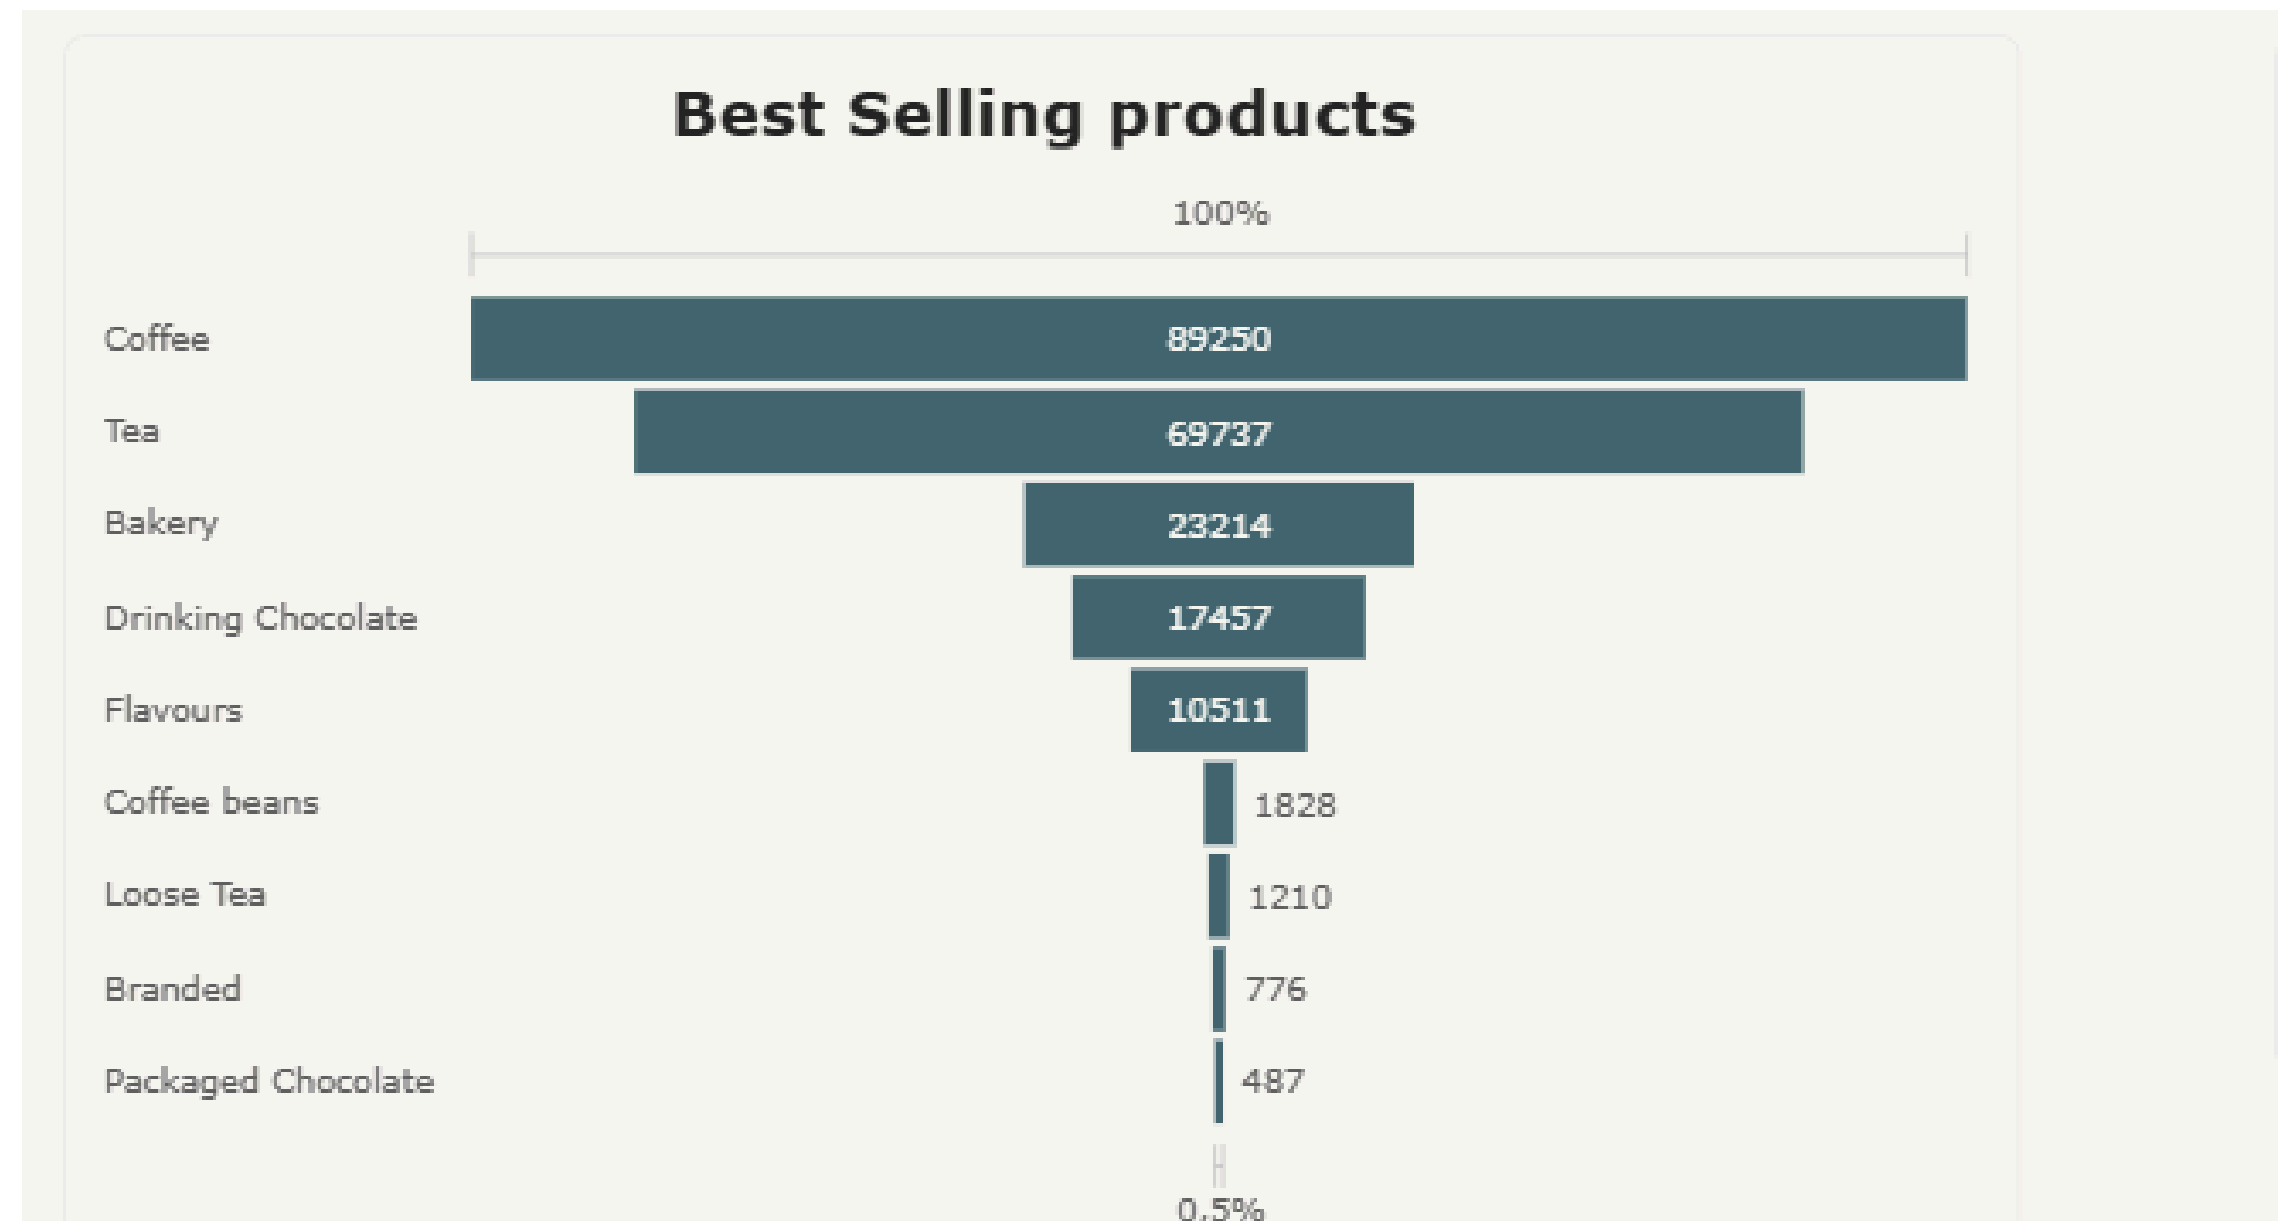

Bakery: R82,316
11.8% of revenue

Market Data insights

Key insights for the CEO :

- Revenue reached R698,812 across 149,116 transactions.
- Coffee is the largest category at R269,952, or 38.6% of revenue.
- Tea is the second-largest category at R196,406.
- The 09:00–12:00 period is the strongest 3-hour interval
- Hell's Kitchen leads stores with R236,511

Recommendations

- Protect the morning peak:
ensure coffee, tea and bakery
stock is available before 09:00.
- Use targeted promotions in
slower afternoon/evening slots
- Combine coffee + bakery and tea
+ bakery combinations.
- Promote selected low-revenue
product types through sampling
or limited-time offers rather than
increasing stock broadly.
- Use store-level dashboards to
identify location-specific
opportunities.

Thank you
so much
